Rushton

- The Sustainable Warehouse reuses over 50 tons of materials per year.
- Hundreds of tons are recycled by our site work contractors every year.
- Nonetheless, it is only a drop in the bucket of what is being disposed of in the Charleston Area.

# How do we get people to reuse/recycle?

## Incentives

## Government regulation

## Incentives

- The Sustainable Warehouse is a 501 c3 non-profit organization, we offer tax deductions for people who use our services.

## Regulation

- Government regulation can be a dicey subject. However, it is important because waste management is a government issue.

# Suggestions

- All municipalities should have mandates to encourage reuse and support reuse alternatives to the landfill.
- They should also be required to have a reuse facility, whether it is government, NGO or privately operated.
